Phones Hardware

See our separate updated pricing sheets for available Phones

Outright purchase or hardware rental over 12, 24, 36 or 60 months available

No physical PBX hardware is required with this system, just a phone for each user.

Select from the following types of phone units

Reception Phone

Desktop Phones

Cordless DECT Phones

Video Phones

Conference Room phones

Vobi Phone App – For Android & iPhone

Turns your cell phone into a switchboard extension. Can be used as a secondary ring on the same extension for when you're not at your desk and you can set Do-Not-Disturb when you don't want to be interrupted

PoE switch

Most of the phones we supply support being powered via the network cable; this usually means no extra cabling needed when desk already has a computer point.

For this you need a PoE switch to supply power.

Some advanced phones support WiFi connections to solve difficult cable-less situations Ask us for a quote on network cabling if you need it.

Power supplies

If not using PoE or if you want to empower your users to rapidly move to a Home Office while remaining on duty, you'll need phone power supplies
